BULL BARS NUDGE BARS

FRONT END PROTECTION

OUR RANGE

The strength, attention to detail, refined features, quality of fit and finish, all add up to why TJM bull bars are clearly suitable for any job.

TJM manufactured aluminium and steel front protection bars are built with unprecedented engineering technology for safety and practicality. Meeting the Australian Design Standards (AS4876.1-2002, ADR 69) and SRS Air Bag compatibility.

OUTBACK

T13 STEEL

The most popular design of our frontal protection range is undoubtedly the TJM Outback bar. If you're after a stylish bar with optimum performance – you can't go past the TJM Outback. Our engineers ensure our customers are equipped with one of the finest products in the market.

- Winch compatible
- Integrated LED fog lights
- Jacking points
- 8000Kg rated recovery points*
- Provision for dual aerials*

*Not available on all models

EXPLORER

T3 STEEL

One of the best looking bars on the market is without a doubt the TJM Explorer Bull Bar. Fitted with a strong steel channel and a single loop over the grille. Where the steel channel enables strong frontal protection, the single provides upper grille protection without adding excessive weight.

- Winch compatible
- Integrated LED fog lights
- Jacking points
- Polyurethane bumperettes*
- 8000Kg rated recovery points*
- Provision for dual aerials*

*Not available on all models

TRADESMAN

T15 STEEL

If you're after a tough bar that is strong, safe and durable – the TJM Tradesman bar is the answer. The steel fleet bar provides top notch protection, without the extra channel folds and built in fog lights which can be deemed unnecessary in the working environment.

- Winch compatible
- Jacking points
- 8000Kg rated recovery points*
- Provision for dual aerials*

*Not available on all models

FRONTIER

T17 STEEL

The TJM Frontier winch bar shares the same durable steel channel design as the Explorer variant to offer strong frontal protection, plus all the features you come to expect. The alloy loop is removed to create a minimalistic look and feel that would satisfy the most discerning 4x4 owner.

- Winch compatible
- Integrated LED fog lights
- Jacking points
- Polyurethane bumperettes*
- 8000Kg rated recovery points*
- Provision for dual aerials*

*Not available on all models

SIGNATURE

T15 ALLOY

If you're after the flagship of the alloy range featuring all the bells and whistles, this is it. Providing excellent protection to your vehicle, unparalleled design, provisions for driving lights and aerials, built in steel winch frame as standard, fog lights and much more, it's no wonder this is the true market leader of alloy bull bars.

- Winch compatible
- Integrated LED fog lights
- Polyurethane bumperettes*
- 8000Kg rated recovery points*
- Provision for dual aerials*

*Not available on all models

TOURLINE

T16 ALLOY NUDEGE

TJM nudge bars are a great solution for protection from minor bumps and scrapes as well as adding value to your vehicle. As with all our frontal protection, they are individually designed to suit the shape of the corresponding vehicle.

- Alloy construction
- Stylish alloy plate or cross bar
- Accommodates driving lights or aerials

*Not available on all models

REAR BAR

REAR END PROTECTION

STEP BAR

RB6 STEEL

To offer the best possible protection when approaching and departing. The TJM RB6 rear bar is manufactured from 50-63mm steel tube, chassis mounted for strength and designed to provide your vehicle's rear panels with solid protection. These bars also feature a checker plate step to access the tray and a Class 4 towbar.

- Reverse sensor for applicable models
- Improved departure angles
- Heavy duty tow bar
- Reinforced recovery points
